**Feedback Analysis 2022-2023 (B. Tech)**

\*\*\*

Feedback on the curriculum has been gathered from various stakeholders, including students, employers, faculty, and alumni. After thorough analysis, several key points and important opinions have been identified.

The following points highlight areas for potential improvement in the curriculum:

**Structure of the GATE Syllabus:** Continue to update the GATE syllabus regularly to keep it aligned with the evolving trends and requirements in engineering and science fields.

**Extracurricular Activities:** To complement the formal curriculum, various extracurricular activities were organized, including clubs, competitions, and events. These activities enriched students' overall learning experiences.

**Learning Resources:** Update the collection of learning resources to keep them aligned with evolving curriculum standards and technological advancements.

**Feedbacks Action taken report 2022-2023 (B. Tech)**

Minutes of the HoDs about feedback from stake holders on curriculum held on 05-04-2023

All the HoDs and BOS Chairman opined that during the analysis process, key observations or findings are identified.

- Introduce to contemporary topics, emerging technologies, and advancements in various fields.
- To participate various activities undertaken at during the academic year reflect our commitment to providing a high-quality education that prepares students for the challenges of the future.
- Resources contribute to a well-rounded education, ensuring that students are well-prepared for the challenges of the future.

Once the BoS reaches a consensus on the recommended curriculum changes, these recommendations will be documented and presented for approval to the relevant administrative authorities or governing bodies within the institution.
