Section 1

Brief Report of the Event [Workshop on Amazon Web Services]

Amazon Web Services(AWS) is a cloud service from Amazon, which provides services in the form of building blocks, these building blocks can be used to create and deploy any type of application in the cloud. These services or building blocks are designed to work with each other, and result in applications which are sophisticated and highly scalable

Background

Cloud computing is a computing style in which scalable and flexible IT functionalities are delivered as a service to external customers using Internet technologies. Cloud computing is not a revolutionary idea; Instead, it is an evolutionary concept that integrates various existing technologies to offer a useful new IT provisioning tool.

Cloud applications extend their accessibility through the Internet by using large data centres and powerful servers that host web applications and services. Anyone with a suitable Internet connection and a standard Internet browser can access a cloud application. Rapid evolution of cloud computing technologies can easily blur its definition perceived by the public.

Objectives of the program	: Protect Postal Service data from unauthorized access, disclosure, modification, and monitoring.
Organization of Event	: GIET (A)
For whom	: Final year Students of MCA
Topics to be covered	: Related to Amazon Web Services Concepts
Organizing team	: MCA

Section 1

Brief Report of the Event [App Development]

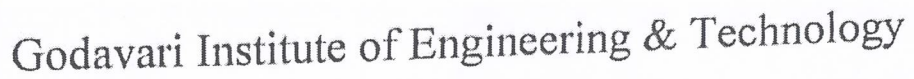

Mobile app development is the act or process by which a mobile app is developed for mobile devices, such as personal digital assistants, enterprise digital assistants or mobile phones. These applications can be pre-installed on phones during manufacturing platforms, or delivered as web applications using server-side or client-side processing (e.g., JavaScript) to provide an "application-like" experience within a Web browser. Application software developers also must consider a long array of screen sizes, hardware specifications, and configurations because of intense competition in mobile software and changes within each of the platforms. Mobile app development has been steadily growing, in revenues and jobs created. A 2013 analyst report estimates there are 529,000 direct *app economy* jobs within the EU 28 members, 60% of which are mobile app developers

Background :

As part of the development process, mobile user interface (UI) design is also essential in the creation of mobile apps. Mobile UI considers constraints, contexts, screen, input, and mobility as outlines for design. The user is often the focus of interaction with their device, and the interface entails components of both hardware and software. User input allows for the users to manipulate a system, and device's output allows the system to indicate the effects of the users' manipulation. Mobile UI design constraints include limited attention and form factors, such as a mobile device's screen size for a user's hand(s). Mobile UI contexts signal cues from user activity, such as location and scheduling that can be shown from user interactions within a mobile app. Overall, mobile UI design's goal is mainly for an understandable, user-friendly interface. The UI of mobile apps should: consider users' limited attention, minimize keystrokes, and be task-oriented with a minimum set of functions. This functionality is supported by mobile enterprise application platforms or integrated development environments (IDEs).

Objectives of the program	: Bringing Talent from the Students through App Development
Organization of Event	: GIET (A)

Brief Report of Seminar on Data Communication

Dr.V.Chandra Sekhar addressed the gathering regarding the issues and the remedial measures for students how to study and learn themselves about Data Communication. Nowadays in the world the major role is played by Data only in anywhere and anytime. For any Function or operation we need data only. We have large amount of data but we need some amount of data only to for the execution of functions then we need to from analysis on data for finding exact data which is suitable to our process or operation.

Background :

Nowadays technologies are beyond the human expectations, hence to know and learn the New technologies which are in the market to work with them efficiently.

Objectives of the program : How the Data can be exchanged between the multiple devices by using different communicating media.

Concluding remarks of the Awareness programme.

Never before has there been a greater need for users to study about Data Communication which deals with data transmission and usage. For the proper and efficient utilization of data users has to know the concepts called analyzation and separation of data in use, which would done by Data Communication..

Section 1

Brief Report of awareness programme on Women safety and security in digital space

Mr. Anisetty Anil Founder & Chairman eSF Labs addressed the gathering regarding the issues and the remedial measures for girl students how to protect themselves if their data has been hacked while they are accessing the internet through phone. He explained about the Trojan virus which affects the data and the spy app(monitors and hacks all our activities through our phone) which is loaded while we are giving our phones for repair. He suggested to verify the IP address while we are communicating to some persons in remote place by using Netstat. He advised all the girl students to use the internet in limit, avoiding of photos posted in groups. If any call received from a stranger regarding blackmail first inform to parents and file a complaint against the phone call to police station. He also motivated the students regarding the internship training will be given to students those who are interested in cyber security.

Background :

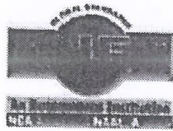

Cyber crimes against women are on the raise and they have been drastically victimized in the cyberspace. Some illegal persons try to defame women by sending obscene e-mails, stalking women and children by using chat rooms, websites etc, developing pornographic videos where women are depicted in compromising positions mostly created without their consent, spoofing e-mails, morphing of images for pornographic content etc. Massive awareness needs to be created among women and children regarding the safe use of Mobile Phones, Computers and the Internet.

Objectives of the program : preventing attacks from unknown persons
Organization of Event : GIET (A)
For whom : Female of MCA students
Topics to be covered : IP Address verification, Virus, SPY App, Phishing
Organizing team : MCA Department/Training and placement cell

Concluding remarks of the Awareness programme.

Never before has there been a greater need for e-entrepreneurs to protect their privacy and anonymity. With the rapid development of the ICTs, the computer systems contain more and more sensitive user data, and security requirements are growing explosively. For this reason, it is necessary to develop techniques to safeguard privacy, particularly for space-time data. Raising security awareness by contributing industry-wise initiatives and liaison with governmental and law enforcement agencies will help women e-entrepreneurs understand the threats and trends. Ensuring secured development methodologies which are used to undertake programming and security-best practices are being applied through the organization will build a solid platform from which to deter electronic crime. Using staff and website user security awareness training, data classification and protection and staff controls and checks will assist in reducing the vulnerabilities. Applying a strategy of 'defense in depth' to protect e-commerce systems will help mitigate the effect of botnet attacks, and a supported and maintained plan for incident detection, prevention, and management will need to be in place.

Section 1

Brief Report of the Event [Workshop on Cyber Security]

Cyber security is the information technology field associated with the security of computer systems and information. It encompasses threats to computer hardware, software and data including theft, hacking, viruses and more. The computer security field has grown immensely as more devices become internet-enabled and more services move online. This workshop has been designed to be practical with lectures, examples and exercises to provide skills, encourage participation and exchange information.

Background :

The number of cyber security attacks is increasing every year. From a total cost of \$445 billion in 2014, the cost of cybercrimes reached \$600 billion in 2017, according to a report by McAfee. One can imagine that 2018 numbers may be even higher. We'll find out at the end of the year. In a Cyber security Ventures report on cybercrimes, the firm projects that the cost of cyber threats will rise to \$6 trillion annually by 2021; that amount encompasses everything from damage and destruction of data, stolen money, lost productivity, theft of intellectual property, theft of personal and financial data, embezzlement, fraud, post-attack disruption to businesses, forensic investigation, restoration and deleted hacked data and systems, to name a few. What investors might not know is that mobile devices are faced with rising cyber attacks, as are medical devices. In fact, spending on medical device cyber security is seen reaching \$65 billion by 2021. To inculcate the knowledge in cyber security this workshop was organized. Main moto is to make the students to create innovative projects during their course work in cyber security.

Objectives of the program	: Awareness on Cyber Crimes and Prevention Methods
Organization of Event	: GIET (A)
For whom	: Final year Students of CSE/MCA
Topics to be covered	: Information Security
Organizing team	: Training and placement /MCA

**Annuxere-I Event Budget for
Workshop on CYBER SECURITY**

For travel booking :Rs.1200/-
Room Rent:Rs.3000/-
Food : Rs.1000/-
Sancks :Rs.500/-
Flexi:Rs.3000/-
Total expense :Rs.8,700/-

Concluding remarks on the Event.

"Report on Workshop on Cyber Security being organized by [Department of Computer Applications] during 18/09/2018 to 20/09/2018. Students from MCA/CSE from Group colleges participated in this workshop benefitted by understanding the security concept by learning hands on session. Students learned about the verification of IP address fake or genuine as well as fake Email identification.

Brief Report of the Event [GUEST LECTURER OF DATA MINING]
Background :

The resource person gave a one and half an hour presentation on the introduction of the classification, its types, different DM techniques, their applications and sample mining and data analytic tools. He explained various classification algorithms and tools. He demonstrated testing and training datasets by using weka 3.8 tools. He also touched upon clinical data mining which was one of the research areas. There was an interactive question and answer session following the presentation and the programme came to an end with the proposal of vote of thanks by one of the students.

Objectives of the program : To Develop analytical skills and improve mining knowledge
 Organization of Event : GIET (A)
 For whom : III Year Student of MCA (Sec-A)
 Topics to be covered :

Problem definition, General Approaches to solving a classification problem, Evaluation of Classifiers, Classification techniques, Decision trees-Decision Tree Construction, Methods for expressing attribute test conditions, Measures for Selecting the Best split, Algorithm for Decision tree Induction, Naive Bayes Classifier, Bayesian Belief Networks, K-nearest neighbor classification Algorithm and characteristics.

Organizing team : MCA

Concluding remarks on the Event.

Guest Lecture on Data Mining being organized by Department of Computer Application A-Section during 19-08-2019. The students were given an insight into the industry perspective and career opportunities available in the field of Data Mining, Data Warehousing and Big data. The students had their queries resolved regarding the various concepts that were covered during the session. Students are learning main idea about preparing and classification of data into graphical format. Now our students can able to handle and do experiments in the weka tool. Even though learn from Opportunities for PhD, program globally. The lecture is helpful for M.C.A. students, research scholars and faculty members of the Master of Computer Sciences who are involved in Data Mining based research activities.

Brief Report of the Event [One day Workshop on Surveying- Total Station]

Background :Gaining knowledge about different aspects and techniques in surveying by using Total station.

Objectives of the program :This program will provide an opportunity to bring together the academia and the practicing engineers to exchange views, experiences and expertise.

Organization of Event : Department of Civil Engineering

For whom :Students

Topics to be covered :**CIVIL ENGINEERING:**

- ✓ Measuring the distance between the two points
- ✓ Horizontal angles
- ✓ Vertical angles
- ✓ Height of an object
- ✓ How to fix the quadrants
- ✓ Measurement of area
- ✓ Leveling Operations
- ✓ Traversing
- ✓ Fixing of column locations for the construction of a Residential Building.

Organizing team :Department of Civil Engineering, GIET(A)

Conclusion:

We have appreciated the engagement and candour that you all have contributed to this workshop. Several important insights and action items were accomplished through this workshop. Cyber security is one of the most important aspects of the fast-paced growing digital world. The threats of it are hard to deny, so it is crucial to learn how to defend from them and teach others how to do it too.

Brief Report of Web Development using Django:

Django is a widely used free, open-source, and high-level web development framework. It provides a lot of features to the developers "out of the box," so development can be rapid. However, websites built from it are secured, scalable, and maintainable at the same time. Django is a high-level Python web framework that encourages rapid development and clean, pragmatic design. Built by experienced developers, it takes care of much of the hassle of web development, so you can focus on writing your app without needing to reinvent the wheel. It's free and open source.

Objectives of the program : Django makes it easier to build better web apps more quickly and with less code.

Conclusion:

We have appreciated the engagement and candour that you all have contributed to this workshop. Several important insights and action items were accomplished through this workshop. Django has emerged as a prominent framework that is loaded with features. It is a server-side web framework that is written in Python and helps the developers in creating web apps quickly and efficiently. Out of all the modern day programming languages, Python and Django are preferred the most by the developers due to their robust programming structure. Python is useful for rapid development with clean designs. It is an iterative language with forward prototyping. The OOP concepts make python cheaper and less time-consuming. If error strikes in any part, the other part will not get affected due to the functions. It is more productive than all other languages. Django Framework has security features that help developers of Django to secure the web applications from a variety of targeted attacks. Attacks like cross-site scripting, SQL injection and cross-site request forgery may harm your web application but these attacks are defended by the Django framework. The security for web

Brief Report of Seminar on Data Analytics with R programming

Dr. M.Kamala Kumari addressed the gathering regarding the issues and the remedial measures for students how to study and learn themselves about Data Analytics with R programming. Nowadays in the world the major role is played by Data only in anywhere and anytime. For any Function or operation we need data only. We have large amount of data but we need some amount of data only to for the execution of functions then we need to from analysis on data for finding exact data which is suitable tpo our process or opearation.Hence by using R programming with Data Analytics, it is very easy and efficient to work with data.

Background :

Nowadays technologies are beyond the human expectations, hence to know and learn the New technologies which are in the market to work with them efficiently.

- Objectives of the program : preventing attacks from unknown persons
- Organization of Event : GIET (A)
- For whom : DEGREE AND MCA STUDENTS
- Topics to be covered : Data Analytics with R programming
- Organizing team : MCA Department/Training and placement cell

Concluding remarks of the Awareness programme.

Never before has there been a greater need for users to study about Data Analytics with R programming which deals with data analysis and usage. For the proper and efficient utilization of data users has to know the concepts called analyzation and separation of data in use ,which would done by Data Analytics with R programming.

Section 1:

Brief Report of the Event

The following report provides a comprehensive overview of the industrial visit arranged for Engineering students at the Satish Dhawan Space Centre (SDSC) SHAR, located in Sriharikota, India. The visit aimed to familiarize students with the advancements, facilities, and remarkable achievements of SDSC SHAR in the field of space technology and research. SDSC SHAR is India's primary spaceport and is responsible for launching various satellites, including those for communication, navigation, meteorology, and scientific research. It is managed by the Indian Space Research Organisation (ISRO) and plays a crucial role in the nation's space exploration endeavors.

SDSC SHAR has achieved several remarkable milestones in the field of space technology. Some notable achievements include:

a) Launch Vehicle Development: SDSC SHAR has played a pivotal role in the development and launch of India's indigenously developed launch vehicles, such as the Polar Satellite Launch Vehicle (PSLV) and the Geosynchronous Satellite Launch Vehicle (GSLV). These launch vehicles have successfully placed numerous satellites into orbit, contributing to the nation's communication, navigation, and remote sensing capabilities.

b) Mars Orbiter Mission (MOM): SDSC SHAR served as the launch site for India's historic Mars Orbiter Mission, also known as Mangalyaan. This mission successfully placed a spacecraft in Mars orbit, making India the first Asian country to achieve this feat and the fourth nation globally.

c) Remote Sensing Satellites: SDSC SHAR has been instrumental in the development and launch of remote sensing satellites, such as the Indian Remote Sensing (IRS) series and the Cartosat series. These satellites have revolutionized applications like land and resource management, disaster monitoring, and environmental studies.

d) Reusable Launch Vehicle Technology Demonstrator (RLV-TD): SDSC SHAR has been actively involved in the development of a reusable launch vehicle, aiming to reduce the cost of space missions. The RLV-TD project focuses on developing technologies for a future spaceplane capable of multiple flights.

During the industrial visit, the students were provided with the following amenities and facilities:

ATTESTED

PRINCIPAL

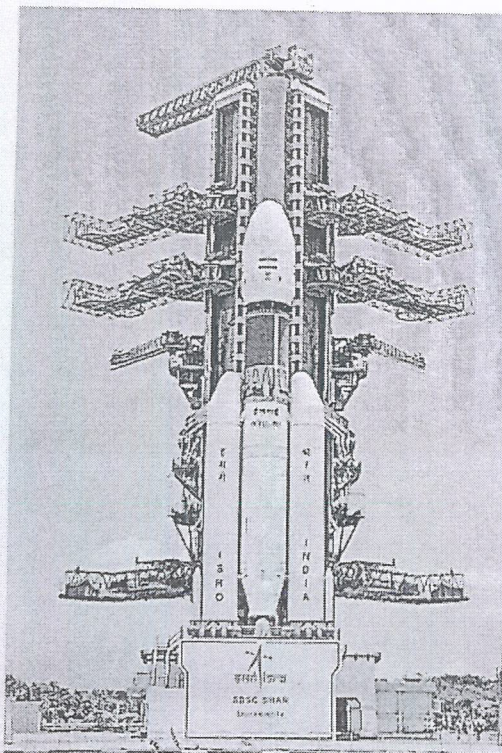

Godavari Institute of Engineering & Tech.(A)
NH-16, Chaitanya Knowledge City
RAJAHMUNDRY-533 296

a) Visitor Center: The visit commenced at the Visitor Center, where the students were given an informative presentation on the history, mission, and key accomplishments of SDSC SHAR. The center displayed various models, exhibits, and audio-visual presentations, providing a comprehensive overview of India's space program.

b) Guided Tour: The students were then taken on a guided tour of the facility, where they witnessed the launch complex, mission control center, and various testing and assembly facilities. They were accompanied by knowledgeable guides who provided detailed explanations and answered questions.

c) Interaction with Experts: The students had the opportunity to interact with scientists, engineers, and technicians working at SDSC SHAR. These experts shared their experiences, insights, and the challenges they faced in the field of space technology. This interaction allowed students to gain valuable knowledge and guidance from industry professionals.

d) Observation Gallery: The visit also included a visit to the observation gallery, which provided a panoramic view of the launch complex. Students witnessed the launch pad and the associated infrastructure, further enhancing their understanding of the launch process.

The industrial visit to SDSC SHAR provided the students with a unique opportunity to witness the advancements and remarkable achievements in India's space technology sector. The visit not only exposed them to cutting-edge facilities but also allowed them to interact with experts in the field. Witnessing the launch complex and learning about significant projects like the Mars Orbiter Mission and the Reusable Launch Vehicle Technology Demonstrator inspired the students and broadened their horizons in the field of space exploration. Overall, the visit to SDSC SHAR proved to be an enriching and insightful experience for the participating engineering students.

Brief Report of the Event [VIJAYAWADA THERMAL POWER PLANT (VIJAYAWADA)INDUSTRIAL VISIT]

Dr Narla Tata Rao Thermal Power Plant or Vijayawada Thermal Power Plant is located at Vijayawada in Andhra Pradesh. It is named after, Narla Tata Rao, the erstwhile chairman of the Andhra Pradesh State Electricity board. The power plant is one of the coal-based power plants of APGENCO. It is well placed between Ibrahimpatnam and Kondapalli villages.

It was developed under 4 stages, with the project cost of Rs 193 Crores and Rs 511 Crores respectively. Again with an investment of RS 840 Crores 2 units were commissioned under III Stage. The seventh unit of 500 MW was commissioned in 2009. The station stood first in country during 94-95, 95-96, 96-97, 97-98 and 2001-02 by achieving the highest plant load factor. The station has received many prestigious awards from various organisations. The station has received Meritorious Productivity Awards for 21 consecutive years and Incentive awards for 12 consecutive years.

*Section I***Brief Report of the Event [HYDROELECTRIC POWER PLANT
(YELESWARAM) INDUSTRIAL VISIT]**

Manihamsa Power Projects Ltd is a Public incorporated on 02 September 1998. It is classified as non-govt company and is registered at Registrar of Companies, Vijayawada. Its authorized share capital is Rs. 41,500,000 and its paid-up capital is Rs. 41,404,700. Yeleswaram is a town in the Kakinada district in the state of Andhra Pradesh in India. We are proud to be that A freedom fighter Chandaka Apparao belongs to this place.

It is involved in Production, collection and distribution of electricity, **the capacity of the plant is 4.5MW**, which comprising of 3 generating units. To full fill the dreams/needs of Agency people the Dam/Reservoir plays very active role.

Yeleru Reservoir Project (Y.R.P.) envisages formation of earth dam across river Yeleru to form a Reservoir near Yeleswaram Village in East Godavari District with gross storage capacity of 24.110 TMC. This Project is proposed to be implemented in two phases.

(i) The Phase - I of the project envisages to supply 73 million gallons per day of water to the steel plant at Visakhapatnam and to stabilize 67,614 acres of existing ayacut of Yeleru Irrigation System. An allocation of 23.440 TMC water for Visakhapatnam was provided in Polavaram Project report under Left Main Canal.

(ii) The Phase - II of the project envisages to irrigate an extent of 1.55 lakh acres in East Godavari and Visakhapatnam Districts, after completion of Polavaram Project and its Left Main Canal.

The following are the some of the important points:

Ayacut	: 53,017 Acres
Maximum flood discharge	: 2.85 Lakhs, 2h cusecs
Canals	: Open Head Channels
Water Allocation for Irrigation(Bo (Kharif and Rabi)	: 12.95 TMC
Water Allocation for Industries (for G.V.M.C or VIWSCo.,)	: 5.00 TMC
Mandals benefited	: Kirlampudi, Gollaprolu, Pithapuram, Jaggampeta, Yeleswaram and Prathipadu
Villages benefited	: 76 Nos

To acquire good knowledge towards Industry our college EEE students visited the above said plant.

Organizing team: Department of Electrical and Electronics Engineering, GIET (A)
