## Wi-Fi Server Login Main Page

## Access Point Status

The screenshot shows a network management dashboard with the following sections:

- Internet:** Connected
- Wi-Fi Networks:** Total 1, Working 1, Disabled 0. Traffic: 2826.11 MB.
- Clients:** Total 148, Connected 147, Disconnected 1.
- Access Points:** Total 50, Working 38, Disconnected 12. Data duration: 1 hour. Display Mode: Card.

The main view is for the 'BH-B-Block' area, showing:

- Summary - 10 AP Groups:** 2 Clients, 47 Traffic.
- System Default:** 1 Client, Traffic.
- BH-A-Block:** (partially visible)
- WLANs:** Total 1.

The 'APs' section for 'BH-B-Block' shows a table with the following columns: Mac Address, IP Address, Device Name, Model, Status, Mesh Mode, and Channel. The table currently contains the text 'No data available'.

Mac Address	IP Address	Device Name	Model	Status	Mesh Mode	Channel
No data available						

At the bottom of the dashboard, there is a search bar and a notification for 'Activate Windows'.

## User details

The screenshot shows the Sophos Firewall web console interface. The main content area displays a table of authentication users. The table has columns for Servers, Services, Groups, Users, Multi-factor authentication, Web authentication, Guest users, Clientless users, STAS, and an expand/collapse icon. The 'Users' column is currently selected.
