Brief Report of the Event

Background

The digital world consists of a lot of electronic devices such as automation devices, gadgets, etc it works on a chip or integrated circuit. So, to design chips a lot of VLSI engineers are required. As we know the importance of VLSI technology increases tremendously in electronics industry. Deliver basics and career opportunities in this VLSI design. It mainly oriented for B. Tech Second, Third & final year students.

Objectives of the program

The aim behind this webinar was to introduce the basic concepts of VLSI design and also gives the knowledge on what are the tools required for this design

Organization of Event

For whom

Topics to be covered

Organizing team

- : B. Tech ECE- 2nd, 3rd & 4th year students
- : Basics & Career opportunities in VLSI
- : ECE Department

Brief Report of the Event [A seminar on Importance of Irrigation structures design and construction features of Sir Arthur cotton barrage]

- Background : Gaining knowledge about different irrigation structures, different types of dams and construction process of Dowleswaram project.
- Objectives of the program : This program will provide an opportunity to bring together the academia and the practicing engineers to exchange views, experiences and expertise.
- Organization of Event : Department of Civil Engineering
- For whom : Students
- Topics covered : **CIVIL ENGINEERING:**
- ✓ Irrigation structures
 - ✓ Types of dams
 - ✓ Construction process of Dowleswaram
- Organizing team : Department of Civil Engineering, GIET(A)

Brief Report of the Event

Background :

As we know the importance of software engineering in many areas has been developed. Deliver quality systems which meet or exceed customer expectations when promised and within cost estimates. Provide a framework for developing quality systems using an identifiable, measurable, and repeatable process. It mainly oriented for B.Tech third & final year students.

Objectives of the program :

The aim behind this webinar was to highlight the framing of the project and how to acquire with knowledge of project management and development and testing.

Organization of Event :

For whom : B.Tech ECE- 3rd & 4th year students

Topics to be covered : System Development life cycle

Organizing team : ECE Department

Brief Report of the Event [Workshop on Web Development with Django]

Django is an extremely popular and fully featured server-side web framework, written in Python. This module shows you why Django is one of the most popular web server frameworks, how to set up a development environment, and how to start using it to create your own web applications. Python Django is a web framework that allows to quickly create efficient web pages. Django is also called batteries included framework because it provides built-in features such as Django Admin Interface, default database – SQLite3, etc. When you're building a website, you always need a similar set of components: a way to handle user authentication (signing up, signing in, signing out), a management panel for your website, forms, a way to upload files, etc. Django gives you ready-made components to use.

Background: Website development is a way to make people aware of the services and/or products you are offering, understand why your products are relevant and even necessary for them to buy or use, and see which of your company's qualities set it apart from competitors. The resource person gave presentation on Web development with Python Django etc. Python Django is a web framework that allows to quickly create efficient web pages.

Objectives of the program : Web development framework that can be used to develop fully fleshed web applications in a short period of time.

Organization of Event : GIET (A)

For whom : III Year CSM of CSE (AIML&CS).

Topics to be covered : Understand Django basics like Function and Class Based Views, URL routing, Models, Gunicorn and etc.
