

7.1.10. Report on the student attributes facilitated by the Institution

We have highlighted a crucial aspect of holistic education. Balancing academic curriculum, co- curricular activities, and extracurricular activities is essential for fostering a well-rounded development in students. Each of these components contributes to the overall growth and skill

1. **Academic Curriculum:** This forms the core of a student's education and provides them with essential knowledge and skills in various subjects. It helps in developing analytical thinking, problem-solving abilities, and a strong foundation for future academic pursuits.
2. **Co-curricular Activities:** Co-curricular activities complement the academic curriculum and provide students with opportunities to develop specific skills and talents. These activities can include debates, quizzes, science fairs, art exhibitions, and more. They encourage creativity, critical thinking, teamwork, and leadership.
3. **Extracurricular Activities:** These activities go beyond the academic and co-curricular spheres, offering students a chance to explore interests outside the classroom. This can encompass sports, arts, music, drama, and clubs focused on hobbies or social causes. Participating in extracurricular activities promotes time management, social skills, and a healthy work-life balance.
4. **Students' Council and Committees:** Students' council plays a pivotal role in representing the student body and advocating for their needs and concerns. Committee participation allows students to take on leadership roles, learn decision-making, and actively contribute to shaping campus life.
5. **Life Skills and Social Interaction:** Extracurricular and co-curricular activities often involve working in groups, dealing with challenges, and managing responsibilities. These experiences cultivate essential life skills like communication, teamwork, adaptability, and problem-solving. They also provide students with a platform to interact with peers from diverse backgrounds, promoting inclusivity and cultural understanding.

Educational institutions that prioritize this balance create an environment where students can excel academically while also developing their talents, interpersonal skills, and a sense of community engagement. It's important to encourage students to participate in a variety of activities based on their interests, allowing them to discover their passions and strengths beyond textbooks. This approach not only prepares them for academic success but also equips them to thrive in various aspects of life.

Student attributes facilitated

S.No.	Attribute	Facilitated through
1.	Knowledge enrichment	Add-on course, online courses
2.	Employability	Placement training, Capacity enhancement programmes, Career counselling and guidance for competitive examinations.
3.	Personality Development	Invited talks and Students Council activities.

RAJAMAHENDRAVARAM-533 296

Through all these activities and other extracurricular activities and by serving in various committees, students improve their leadership, interpersonal skills and self-confidence. This also allows them to link their academic knowledge with practical experience thereby leading to a better understanding of their own abilities and career goals. The college feels proud that our students have been successful in various fields such as IT Industry, Coaching of different sports, Police department, Auditing, Journalism, TV and Radio, Banks and Government sector. Through Sports activities have made three to five students every year to serve as coach for Ball badminton and Volleyball.
